Database Description: PsycINFO provides abstracts and citations to the scholarly literature in the behavioral sciences and mental health. The database includes material of relevance to psychologists and professionals in psychology and related fields such as psychiatry, management, business, education, social science, neuroscience, law, medicine, and social work. PsycINFO covers journal articles, book chapters, books, dissertations, and technical reports. Journal coverage includes international material selected from more than 1900 periodicals written in over 24 languages. Current chapter and book coverage includes worldwide English-language material published from 1987-present. Over 60,000 references are added annually through weekly updates.

Produced by: The [American Psychological Association](#).

Dates covered: From 1967 UPDATES: Weekly.

Off-campus access via: UA Proxy Server and OhioLINK Remote Authentication

Searching Thesaurus or Keywords: PsycINFO has three special options on its search menu:

- **Thesaurus:** Search your word or phrase in the PsycINFO thesaurus.
- **Keywords:** Search your word or phrase everywhere in the database, except for cited references.
- **Keywords plus cited references:** Search your word or phrase everywhere in the database, including cited references. Select this option for any field-qualified searches, like those shown in this document.

Option	Keyword or Phrase	Finds
√ Thesaurus	learning	thesaurus terms beginning with the word "learning"
√ Keywords	spatial language	the exact phrase "spatial language" anywhere, except for cited references
√ Keywords plus cited references	spatial language	the exact phrase "spatial language" anywhere, including cited references
√ Keywords plus cited references	(myles and simpson).au.	Myles and Simpson as co-authors
√ Keywords plus cited references	(ashby same 2004).cit.	Articles that cite an article by Ashby published in 2004

Find a Copy: Click FIND A COPY to discover how to get a copy of this article or book.

- If the full text of a journal article is available online, FIND A COPY can connect you directly to it.
- If online full text is not available, check whether your library owns the journal in print or any other format.
- If this item is a book and is found at an OhioLINK library, you can determine whether your library owns it, or request it from another library.

Wildcard / Truncation: PsycINFO uses a dollar sign (\$) to truncate terms.

Boolean Operators: PsycINFO uses: ADJ, AND, OR, NOT, NEAR, SAME, WITH

ADJ: Finds records that contain both words right next to each other, in the same sentence, and in the order given in the search statement. Adjacency is the default search operator for these databases, so it is usually not necessary to specify. ADJ is the same as the menu choice SEARCH FOR THIS EXACT PHRASE.

AND: Finds records that contain both words, although not necessarily in the same sentence or in the given order. AND ties the two concepts together and provides a more narrow search than just a single word alone.

OR: Finds records that contain either word or both words. Use OR for synonymous or related terms; this broadens the search.

NOT: Finds records that contain the first word and that do not contain the second word.

NEAR: Finds records that contain both words right next to each other, in the same sentence, in either order. This is similar to ADJ, although with NEAR, the words may occur in either order.

WITH: Finds records that contain both words in the same sentence. The system recognizes a sentence as ending with a period-space-space. Some databases supply just a single space at the end of a sentence so, for example, all the sentences in an abstract seem to the system like a single sentence. In such fields, WITH produces the same results as SAME.

ADJn: Finds records that contain both words, in the same sentence, in the order given, where "n" specifies the maximum number of indexable words from the first to the second. This is similar to ADJ, except that you are permitting some number of intervening words.

Limiting: Limit results by **language, date, publication type, or study type** (human, tests & measures, etc.)

Need Help?

- Stop by the library
